

Workshop Topics

A number of topics that consistently generate a high level of interest will be the focus of the 2011 workshop series. Speakers will touch on:

Site Planning and Design

Practical, on-the-ground ideas that get projects off to the best start while respecting the ecological features and functions that make our region great.

Passive Building Design

Learn how to harness natural processes through passive design strategies that improve building performance and occupant comfort.

Alternative Systems

Find out how alternative building systems can help you tap into renewable resources, generate energy and recycle water.

Home Energy Assessment

Learn about home energy assessment and EnerGuide Ratings for new and existing homes, and how anyone can make cost-effective improvements.
