Notice to Residents:

Re: Noise Bylaw Exemption Wednesday, August 22, 2018 to Wednesday, September 5, 2018

North America Construction (1993) Ltd. (NAC) is constructing the Secondary Treatment Upgrade Project for the Regional District of Nanaimo's Greater Nanaimo Pollution Control Centre at 4600 Hammond Bay Road. As a part of the scope of this project we are required to perform concrete repair works in plant main effluent channel. To safely and efficiently perform this work a temporary pumping system will be installed and operated 24/7 to divert the flow and provide our subcontractor access to the effluent channel and to ensure continues plant operation. Flow diversion must be provided continuously to provide dry conditions in the channel for curing applied materials during surface clean-up and preparation, and application of new shotcrete concrete material.

The City of Nanaimo has granted NAC a Noise Bylaw exemption to complete work from Wednesday, August 22, 2018 to Wednesday, September 5, 2018. Neighbouring residents may notice noise and light during this time.

The bypass pumping system will involve continuous operation of a 12" diesel pump equipped with noise attenuation equipment. During periods of unusually high flows second pump will engage as required. It is our highest priority to complete the work and remove temporary pumps in a timely manner. We do not foresee the work taking up the entire duration of the permit, but given the nature of this work we would like to ensure we have several days as contingency.

While we may request future Noise Bylaw exemptions, we will make efforts to keep construction activities within the regular construction hours.

Please call me to discuss if you need any further information.

Thank you,

Phillip Longo
Project Coordinator
