

Property Declaration Form

for Riparian Areas, Nesting Trees,
and Site Profiles

Subject Property Legal Description:

Subject Property Civic Address:

Subject Property PID:

Riparian Areas

I (we) acknowledge that the province of British Columbia enacted the *Riparian Areas Regulation* to protect the critical features, functions, and conditions required to sustain fish habitat. Furthermore, this legislation prohibits the Regional District of Nanaimo (RDN) from approving or allowing a development to proceed adjacent to a watercourse until it has received notice that a report prepared by a Qualified Environmental Professional has been received by the Ministry of Environment.

I (we) understand that a water feature includes any of the following:

- a) any watercourse, whether it usually contains water or not;
- b) any pond, lake, river, creek or brook; and/or,
- c) any ditch, culvert, spring, or wetland.

I (we) declare that I (we) are familiar with the property and area, and have inspected the property and immediate area for the existence of any water features. I (we) declare that (***please check the one that applies***):

- that there are no water features located on the subject property; or
- there are water features located on the subject property.

I (we) declare that all proposed development including land alteration, vegetation removal, alteration or construction of a building or structure (***please check the one that applies***):

- is greater than 30.0 metres from a water feature; or
- is less than 30.0 metres from a water feature.

Eagle and Heron Nesting Trees

I (we) acknowledge that the *Wildlife Act* protects Bald Eagles and Great Blue Herons, their eggs and nests. Bald Eagles and Great Blue Herons are sensitive to development near their nesting sites and may return to a nest that has been unused for a number of years.

While the provincial government and the RDN undertake mapping of nesting sites from time to time, not all are mapped. Some on private property may have been undetected, and new nests are continually being built. Typically, a 60 metre radius for an eagle nesting tree and depending on the level of development in an area, a 60 - 300 metre radius for a heron nesting tree (or trees) is considered to be sensitive to disturbance. Electoral Areas A, E, G and H require that a development permit be obtained prior to development near an eagle or heron nest.

Mapped eagle and heron nest trees can be found on the Community Mapping Network at www.cmnmaps.ca/WITS/ and www.cmnmaps.ca/GBHE/.

I (we) declare that I (we) are familiar with the property and area, and have inspected the property and immediate area
